

NGV 2012 PRAGUE

Prospects for the Developments and use of CNG in Transport

The highly favourable responses to our international conferences on the use of compressed natural gas in transport have convinced us of the need to hold regular meetings and exchange experience at this level. The Czech Gas Association is therefore preparing the fifth edition of the international conference, exhibition to be held in Prague, capital of the Czech Republic.

Mr. Miloš Kebrdle, the Czech Gas Association Secretary General, invites you cordially to join us on

20 and 21 February 2012

The objective of the conference is to enhance CNG in transport, CNG infrastructure with a sufficient number of refuelling stations, support growth in the number of CNG vehicles, and provide drivers with greater comfort, easy travel across the various countries, less expensive journeying, and the good feeling of contributing to environmental protection.

Please make a note of the conference date in your diary now!

The continuously increasing movement of goods and people has turned some parts of Europe into real crossroads and the situation in the Central European region is no exception; levels of traffic, emissions and noise peak there, deteriorating the quality of the environment and producing irreversible impacts on nature and populations.

Our NGV conference offers a unique opportunity to all businesses operating in road transport, company managers, state administration and local governments, mayors and councillors and all those who are interested in CNG use in transport.

- Meet the speakers and discuss the latest hot issues with them
- Hear about the most recent developments in NGV, natural gas use in the automotive industry, and CNG infrastructure
- Discuss the key issues of future developments in transport from the environmental perspective
- Obtain professional information on the actual situation of NGVs throughout the world
- Actively join the Q & A session to hear roundtable participants' views.

1st International NGV Conference 2008

23 and 24 January
18 speakers (Canada, Belgium, Spain, Italy, Slovakia, Czech Republic)
134 registered participants
Venue: Dorint Hotel Don Giovanni, Prague
